Education

Rutgers University

BACHELOR OF ARTS IN COMPUTER SCIENCE

New Brunswick, New Jersey

Sept. 2020 - May. 2024

Experience

Infrastructure and Backend Engineer

Iselin, New Jersey

WELLS FARGO

Aug 2026 - Present

- Engineering and maintaining infrastructure applications supporting container lifecycle management and enterprise security workflows using Go, Python, and Orchestra
- Automated container image repave and rebase workflows, reducing manual effort and improving consistency across infrastructure environments
- Executing vulnerability remediation workflows to identify, process, and resolve security issues across containerized applications

Software Engineer

Charlotte, North Carolina

WELLS FARGO

July 2024 - Aug 2026

- Developed Java applications to generate packages for Home Lending
- Resolved security vulnerabilities across 25+ Java microservices by implementing code fixes, validating compatibility, and deploying updates to production environments
- Maintained CI/CD pipelines in Harness, OCP, Jenkins, and UCD to automate application builds and deployments.
- Monitored 4+ applications and 20+ environments to detect and resolve application issues, along with contributing to weekly releases
- Worked alongside a team of developers to automate verification of the creation of loan packages, which speeds up workflow by 60%.
- Used multithreading in Python to manipulate hundreds of zip files simultaneously per execution, then creates .cec/.cem files with information from each zip file. This makes it so the script can process zip files 250% faster/min. This is then deployed to multiple Linux VM's.
- Made configuration changes to upgrade external/internal libraries and their dependencies using Gradle and Artifactory.

Web Designer

New York City, New York

CREATE HUMANITY 501(C)(3)

Jan. 2022 - Dec. 2023

- Increased sales by over 60% by collaborating with two senior executives on the full-stack design and implementation of the website for over 5000 users monthly using HTML, CSS, and JavaScript.

Projects

Internal Workflow Automation System

Charlotte, North Carolina

CROSS-PLATFORM INTEGRATOR

April 2025 - September 2025

- Automated employee onboarding by using Google Apps Script to trigger emails based on Google Sheets and Docs inputs, and integrated SignRequest for document signing
- Connected Slack for event scheduling and Notion for auto-generated weekly recaps, complete with dynamic task assignment automation

Beast Bot

Charlotte, North Carolina

MULTI-FUNCTIONAL DISCORD BOT

May 2024 - Present

- Developed and deployed a scalable Python-based Discord bot on a Ubuntu-based VM hosted on Oracle Cloud Infrastructure, deployed using docker, and serving over 5000+ users daily
- Integrated MongoDB to manage personalized user, game, and event data
- Built automated discounts and personalized notifications, increasing subscription count by 40%

Skills

Engineering skills + Capabilities

- Languages: Java, Python, SQL, C, Javascript, Lua, Perl, JSP, HTML, CSS, MATLAB
- Technology: MongoDB, Git, Docker, OCP, Harness, Jenkins, Jira, Gradle, Splunk, Groovy, UCD, Postman, Oracle Cloud, Artifactory, Expere, Kafka, Spring Framework, JDBC, Unix, NodeJS
- AZ-900 Certification, DevOps, CI/CD Pipeline, Full stack, Data Management, Algorithms
